Temporary Body Storage Service

#### II.1.2) Main CPV code

- 45215000 - Construction work for buildings relating to health and social services, for crematoriums and public conveniences

#### II.1.3) Type of contract

Works

#### II.1.4) Short description

The Authority seeks to procure a [framework agreement for temporary body storage in the event of an excess deaths situation for the 32 London boroughs and the City of London](#), led by Westminster City Council. The framework agreement will appoint a single provider and will be for a period of 4 years. This will be a contingency contract, only called upon in the event that an excess deaths situation arises in the future and existing local body storage capacity needs to be augmented.

The over-arching aim of this tender is to provide a single framework supplier that will be able to provide temporary body storage facilities to house deceased in the event of an excess deaths situation. The deceased will be stored with dignity and respect, at locations to be determined based on local London needs at the time and will require some design elements to accommodate local site conditions and constraints, while being capable of rapid deployment, construction and commissioning to an agreed standard. This framework will be procured by the Authority as the pan-London lead, but all London local authorities may call-off against the framework.

This will be a contingency cover framework and as such there is no minimum guarantee of any level of spend or call-off under the framework agreement.

#### II.1.5) Estimated total value

# How Long Do the Vaccinated Have to Live?

By Steven Fishman

I deferred this question to a friend of mine, **Dr. Mylo Canderian, Ph.D.** [born Milos Iskanderianos, Corfu, Greece, 1938], **who developed the patent for Graphene Oxide for use as a Hematological Bioweapon in 2015.**

In full transparency, **Dr. Canderian is what I would call a "Genocidal Globalist,"** who follows Precept Ten of the Georgia Guidestones, which is very seldom discussed, stating "Be not a Cancer upon the Earth; Leave Room for Nature." Dr. Canderian is a Medical Contributor to the World Health Organization and is also very supportive of Klaus Schwab and the "Great Reset," ushering in one world digital currency which is a secondary goal of the WHO for 2022.

**Dr. Canderian is of the opinion that 95% of the world's population are "Useless Eaters" who need to be euthanized as quickly as possible.** "Look at downtown Chicago, Baltimore, or Los Angeles," he has stated, "and you will clearly see why the Useless Eaters must be put down like rabid dogs." He has expressed his disdain for "Infectious Educators" who promote Critical Race Theory, and is confident that the "vaccine" will put an end to "Human Cancer Upon the Earth." Dr. Canderian is an ardent supporter of Freemasonry's Duty and Obligation to rid the world of the "Plague of Humanity."

Yet on a personal level, he and I share a passion for the same exotic dish served at L'eminence de Veau in Geneva: Cream of Hummingbird Soup followed by Elk Tongue. We both are fans of Chef Gaston Sere de Rivières, who is a culinary genius.

**So, I asked Mylo, "How can the "vaccinated" know with certainty how long they have to live once they have been jabbed?"**

**He presented me with the information, called the "End of Cycle Formula." He explained how easy it is to calculate. "The Power of Simplicity," he said. "There is a maximum cycle of ten years from injection to End of Cycle," [or death], he elaborated. "And it is extremely easy to determine." He said any hematologist can see it within seconds under a microscope, and even more readily under an electron microscope. "The percentage of blood affected [or contaminated] by or with Graphene Oxide is the reciprocity of the End of Cycle calculation," he divulged. In other words, an "inoculatee" [as he calls anyone jabbed with the Experimental Use Authorization Eugenics Depopulation Lethal Injection Bioweapon] having 20% Graphene Oxide deterioration in their blood will, barring any other input criteria, live for 8 years. [10 years less 20%]. Someone with 70% Graphene Oxide deterioration will not live more than 3 years. [10 years less 70%].**

Dr. Jane Ruby recently was interviewed by Stew Peters on his podcast and showed examples of what the deteriorated blood looks like when exposed to Graphene Oxide. Graphene Oxide, for those who are unaware, is the component of Messenger RNA spike proteins and prions, which is at war with the heart, lungs, brain and blood for oxygen. Graphene Oxide is an oxygen sponge which deprives the body of necessary oxygen and causes many complications, including but not limited to anaphylactic shock, toxic blood clotting, fatal lung paralysis, mitochondrial cancer, and endothelial cancer."

**Dr. Mylo Canderian's viewpoint is much the same as Klaus Schwab, Bill Gates, and the Big Pharma CEO's: LET THEM ALL DIE!**

I asked Mylo what the effect of second and third shots and boosters do and how that changes the End of Cycle table.

Mylo replied: "It is all measurable through hematological testing. The more shots and boosters the imbeciles get, the worse their blood will look under a microscope, and the quicker they will turn to fertilizer."

Finally, I asked him how the plot to kill so many billions of people could be kept so secret by such a group of elites.

His answer was: "You don't know much about Freemasonry, do you, Steve?" And there you have it.
